### Important July Dates

(All times are CDT)

#### **July 4 - Independence Day**

##### *To The Founding Fathers*

Your light still lingers in our distant morning,  
A star that we perceive across the void.  
We chart our passage by your words, still burning  
Long after your bright core has been destroyed.  
No longer do we speak of "natural" rights,  
Nor can we think that Reason guides our will.  
We've been through far too many gruesome nights  
To hope we have reduced our lust to kill.  
Yet hope remains the engine of our fire,  
Hope that someday all of us will be  
Happy in the least that we require:  
Well-fed, well-housed, safe, secure, and free.  
This dream we still pursue. Though darkness come,  
Your wisdom, hope, and courage through us run.

**July 7, 4:21 am - Full Moon, 4:38 am - Lunar Eclipse**

***The Blessing Moon***

Dive into the juicy energy of the July Full Moon and swim deep in her blessed, abundant energy. Dream, meditate and intuitively divine, there's great magickal strength, power and clarity in this time. Let visions flow, so you know how to best prepare for the hard work that harvest requires. Plan your steps to success, within the garden and within your life. Know what you will harvest and how you will store it to sustain you throughout the winter - that time of death and dark journeying. Gather herbs for drying and preservation, preparing for magick, medicine and sustenance. And in a spirit of celebration, leave an offering in the moonlight, in the garden or out of doors, for the spirits of nature. Thank them for the radiant abundance.

*Wort Moon, Hay Moon, Thunder Moon protect  
Under your light these herbs I collect,  
Cerridwen, Athene, Holda, Venus,  
In dreamwork and divination your spirits guide us.*

**July 21, 9:34 pm - New Moon, 9:35 pm - Solar Eclipse**

***The New Moon in Leo***

This week brings us one of the most significant astrological aspects of the year, a New Moon Solar Eclipse in Leo.

If you have this eclipse in a sensitive area of your chart, you are feeling it already. In fact, you've been feeling it since this series began in February, and the story that is unfolding in your life will continue for another year, until we enter a new series of eclipses in Capricorn and Cancer.

Eclipses occur in sign pairs, determined by the position of the lunar nodes. The North Node currently is at 18 degrees Aquarius, with the South Node opposite at 18 degrees Leo. This week's eclipse falls at 9 degrees Leo, making it a South Node eclipse. Anyone with planets or chart angles between 4 and 14 degrees Leo or Aquarius will feel this eclipse the most, but you'll also feel it if you have planets or chart angles between those degrees of Scorpio and Taurus.

Eclipses tend to bring rapid change into our lives, faster than is comfortable for us. This is especially true for the fixed signs (Taurus, Leo, Scorpio, Aquarius). It's said that the fixed signs fight change, but that's not entirely true. That would be like saying that a rock fights change. We are so solid that change is extremely difficult for us. Even Aquarius, the air sign ruled by the Uranus, planet of sudden change and revolution, has a hard time getting into a new groove, as much as we usually want to.

New Moon eclipses typically are about new beginnings. It appears that a relationship that began at the solar eclipse in Aquarius in February has reached a logical conclusion, and it either will begin again under different circumstances, or it will disappear, clearing the way for another that is viable and sustainable. The learning process has been painful but extremely enlightening, and there is a possibility that deep healing will take place.

## **Stone of the Month**

**Labradorite** - A sister to moonstone, labradorite links to the "darker" Crone aspects of the Goddess, and grants inner knowing of Mystery. It enhances intuition and psychic perception. Like the cord-cutting Crone, it helps the bearer to release judgment, and understand their destiny. Use it to bring Light to the shadowed realms of the self and to connect with the power of the waning Moon. It protects one's aura, and helps to keep the aura clear, balanced, protected, and free from energy leaks. It also assists in the alignment of subtle bodies, enhancing the connection between the physical and ethereal realms.

According to an Eskimo legend, the Northern Lights were once imprisoned in the rocks along the coast of Labrador. It is told that a wandering Eskimo warrior found them and was able to free most of the lights with a mighty blow of his spear. Some of the lights were still trapped within the stone, and thus we have today the beautiful mineral known as labradorite.

Traditionally, labradorite is thought to bring good luck.

## **Spell of the Month**

### ***Money, Money Spell***

This spell may be done at any time, but preferably at the same time each day or night.

You will need a Green Candle and a White Candle. The Green candle represents the money, and the white candle represents you. Make sure you anoint the candles with oil first, thinking of your desire for money to come to you. Set the candles on your alter or table 9 inches apart. After doing this say

"Money, money come to me  
In abundance three times three  
May I be enriched in the best of ways  
Harming none on its way  
This I accept, so mote it be  
Bring me money three times three!"

Repeat this for nine days. Each day move the white candle one inch closer to the green candle. When the candles touch, your spell is finished. Make sure you visualize the money pouring in from the universe.
